Proposal

# Youth Empowerment Proposal

**BAHEYA**

Baheya foundation for early detection  
& treatment of breast cancer

On behalf of **Baheya's Psychological Support and Volunteer Work Department**, we would like to reach out to you regarding a collaboration opportunity to build skills, develop positive behavior and raise awareness of breast cancer among your students.

We aim to build compassion, empathy and heartfulness inside every student's character through our programs that showcase Baheya's fighters life experiences.

We very much look forward to hearing back from you.

# About Us

The Baheya Foundation was named after Mrs. Baheya Wahby, an Egyptian woman who battled with breast cancer. During her treatment, she noticed how difficult and expensive it is to receive treatment especially for low-income families.

Baheya's family decided to convert their family home into the hospital we know today. Since then, it became the home of many breast cancer patients.

Baheya Foundation is a non-profit organization (NGO) and medical center which became the first destination for women's health and safety. We are an association that provides innovative programs specialized in awareness, early detection, and treatment of breast cancer, and psychological support for women using the latest technologies.

Our Program mainly targets students so they can be exposed to a new environment through volunteer work, social services and being Baheya's ambassadors in their social circles.

## Our purpose :

Our goal is to foster understanding and empathy among students regarding the challenges faced by individuals afflicted with breast cancer. Therefore, we propose a series of engaging activities for students through which we can create compassionate and supportive individuals.

We hope our educational awareness can empower them to make informed choices and promote breast cancer awareness.

- **Our Activities**

**They include but are not limited to the following:**

- **Raising awareness sessions**

We not only talk about the importance of early detection but also about the importance of psychological support and its impact on the patient's smooth journey. We can also incorporate personal stories or even survivor testimonials.

# Engaging and interaction with students:

- **Bazar:**

This is an idea we came up with in Baheya in order to help our cancer patients survivors to guarantee an income. They create hand-made products and we facilitate for them the marketing and the purchasing of their items.

# Visit to Baheya hospital

**Thank You**
